

Strategic Links

This document outlines the strategies, plans and policies that underpin the NSW Landcare Enabling Program. Funded staff should familiarise themselves with these documents and promote them to groups and networks when planning projects so that they can align and contribute to high level strategic environmental outcomes at a grassroots level.

A link to the full strategy document is provided at the end of each section.

State Strategic Links

Landcare NSW Strategic Business Plan

The Landcare NSW Strategic Business Plan 2022 - 2007 outlines where we are going and how we will get there. The Landcare NSW purpose is: We support Landcarers and our members, so local communities and environments flourish.

[Landcare NSW Strategic Business Plan](#)

Local Land Services State Strategic Plan

The Local Land Services State Strategic Plan 2020-2030 outlines our vision, strategic, services and products from a state wide perspective which then feeds into local strategic plans.

[Local Land Services State Strategic Plan](#)

Biodiversity Conservation Trust Business Plan

The NSW Department of Planning, Industry and Environment Biodiversity Conservation Trust Business Plan 2021-2022 to 2024-25 sets out the strategic goals of the Biodiversity Conservation Trust (BCT). The program represents an important enabling function, with LNSW highlighted as a key partner to provide services to assist the Biodiversity Conservation Trust in achieving its outcomes.

Download the Biodiversity Conservation Trust Business Plan from the [publications and research page](#) of the Biodiversity Conservation Trust [website](#).

Crown Land 2031 - State Strategic Plan

The Crown Land 2031 - State Strategic Plan presents the 10-year vision for Crown Land in NSW. The program supports achievement of the key priorities relating to protecting environmental assets, improving and expanding green space, and building climate change resilience.

Economic Vision for Regional NSW

The Department of Regional NSW 20 -Year Economic Vision for Regional NSW - Refresh guides transformative, once in a generation investment to ensure every region and community benefits. The vision sets out a range of investment priorities, including the following that are relevant to the Landcare Program: digital connectivity, tailored skills and education offerings.

[Economic Vision for Regional NSW](#)

NSW Salinity Strategy

The NSW Salinity Strategy outlines a suite of targets, regulation, market-based solutions, strategic investment, regulation and business opportunities. The strategy will also drive research, science-based decision making and the implementation of pilot projects across NSW.

NSW Biosecurity and Food Strategy 2022-2030

The NSW Biosecurity and Food Strategy 2022-2030 sets objectives for biosecurity and food safety in NSW. This Strategy provides guidance to the management of risk posed by the interdependencies between people, plants, animals, food, and the environment, to promote sustained wellbeing and economic prosperity.

Biosecurity and food safety is a shared responsibility - industry, research, government partners, and the community working together to ensure four strategic objectives are met:

1. Prepare and prevent - adopt innovative solutions to effectively manage future and emerging threats through improved prediction, early detection and better understanding of risk pathways.
2. Timely and risk proportionate responses - make informed and risk-based decisions to proportionately respond to biosecurity and food safety threats.
3. Rapid and efficient containment - minimise the adverse impacts of biosecurity and food safety threats on economy, environment, and community, while also maximising product integrity and market access opportunities.
4. Partnerships to minimise impacts - engage stakeholders and share responsibility to minimise the impact of biosecurity and food safety threats, including exotic and endemic pests, diseases and weeds, and foodborne illness.

[NSW Biosecurity and Food Strategy 2022-2030](#)

Regional Natural Resource Management Plans

Local Land Services Regional Natural Resource Management Plans prioritise long-term action and NRM service delivery to ensure that investment is based on the best available scientific, economic and social information. NRM Plans are developed in collaboration with land managers, industry and community groups.

Links to each of the regions Natural Resource Management Plans and any supporting documentation can be found [here](#).

NSW Environmental Trust Strategic Plan 2020- 2024

The NSW Environmental Trust Strategic Plan 2020- 2024 outlines the Trust's strategy for funding projects that conserve, protect and rehabilitate the NSW environment. The program significantly contributes to the achievement of priorities of the Strategic Plan.

[NSW Environmental Trust Strategic Plan 2020 - 2024](#)

National Strategic Links

Australia's Biodiversity Conservation Strategy

Australia's Biodiversity Conservation Strategy 2010- 2030 sets out three national priorities for action to stop the decline in Australia's biodiversity. The program supports the strategy in achieving its sub-priorities including mainstreaming biodiversity, increasing indigenous engagement and others.

[Australia's Biodiversity Conservation Strategy 2010- 2030](#)

Environment Protection and Biodiversity Conservation Act

The Environment Protection and Biodiversity Conservation Act 1999 (EPBC Act) provides the legal framework to protect and manage Australia's biodiversity and environment. The program contributes to enhance achievement of the intended outcomes of the Act.

You can find [Information and a summary video regarding the EPBC Act here](#) or to view the full Environment Protection and Biodiversity Conservation Act 1999, head to:

International Strategic Links

Kunming-Montreal Global Biodiversity Framework

The Kunming-Montreal Global Biodiversity Framework outlines 23 action oriented global targets for urgent action over the decade to 2030. Specifically relevant to Landcare NSW are Target 2, relating to the effective restoration of degraded ecosystems and Target 3, relating to protection and area-based conservation of terrestrial, inland water, coastal and marine areas.

You can find the targets with target notes [here](#) and click below to access the full framework.

Decade on Ecosystem Resoration

The United Nations Decade on Ecosystem Restoration 2021 - 2030 seeks to prevent, halt and restore the loss of nature, globally. Restoration is a monumental task. Over the next ten years, every action counts. Every single day. Every country, company, organization, and individual has a role to play. The [National Landcare Network](#) is one of the registered actors (contributors) to the UN Decade of Restoration.

Read the UN Decade [strategy and its summary](#) to learn more about recommended actions.

Sustainable Development Goals

[The 2030 Agenda for Sustainable Development](#), adopted by all United Nations Member States in 2015, provides a shared blueprint for peace and prosperity for people and the planet, now and into the future. At its heart are the 17 Sustainable Development Goals (SDGs), which are an urgent call for action by all countries - developed and developing - in a global partnership.

They recognize that ending poverty and other deprivations must go hand-in-hand with strategies that improve health and education, reduce inequality, and spur economic growth - all while tackling climate change and working to preserve our oceans and forests.

Access the 17 Goals and the achievements to date [here](#).
